- **Cloud Service:** AWS, FireBase.
- **Version Control System:** GitHub, Jira.
- **Other Tools:** Docker

## CERTIFICATIONS

- Full Stack Development Course, Creative Design and Multimedia Institute (2022-2023)
- **Projects:** Blog management system, Bus management system, Watch Selling system, Company profile management system, Online job applying system

## PROFESSIONAL EXPERIENCE

**Junior Full stack web developer**
HMR Technology | Feb-2024 | Present

- Collaborated with a team of developers to design and develop web applications
- Implemented user interfaces and user experiences for web applications, ensuring a seamless and intuitive user experience
- Developed RESTful APIs for web applications, enabling efficient communication between the front-end and back-end
- Implemented integration tests for web applications, ensuring high-quality and reliable code
- Continuously learned and stayed up-to-date with industry trends and best practices

## PROJECTS

- **Online Job Applying System:** Developed an online job applying system using Node.js, Express, and Postgres SQL, enabling job seekers to search and apply for jobs, and employers to manage job postings and applications.
- **Bus Management System:** Built a comprehensive bus management system using PHP, HTML, CSS, JavaScript, and MySQL, enabling users to manage bus routes, schedules, and bookings, payment module integration with Razorpay, SMS service integration with Twilio, mail service integration with SMTP, Google login functionality using OAuth 2.0, and OTP system for authentication, providing a seamless and secure experience for users.
- **Blog Management System:** Developed a web-based blog management system using React, Node.js, and MongoDB, allowing users to create, edit, and publish blog posts.
- **Watch Selling System:** Created an e-commerce platform for selling watches using React, Node.js, and MongoDB, featuring product catalog management.
- **Company Profile Management System:** Designed and developed a company profile management system using HTML, CSS, and JavaScript, allowing users to create and manage company profiles, including employee data and department information.
